## Local Men Get in Car Accident

### Timely Discovery Prevents Fire

Wednesday last, August 12, the young Bills children and Ed. Meyers unearthed a fire in one of the bins at the E. Bills barn, and averred what might have been a disastrous fire.

Last Wednesday Ed. Meyers had occasion to visit Evert's Bills in connection with his work. Pending the return of the men from the field, Ed. was invited to stay to supper. During the preparation of the meal, the young Bills children rushed in and said they smelt smoke in the barn. There had been a smoky haze around the place all day from the forest fires raging at that time, and it was presumed this was what the children meant.

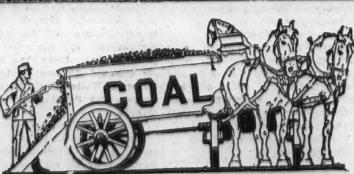

A second time the children came in and said they smelt smoke in the barn, so Ed. decided to investigate.

Entering the barn and examining it, everything appeared O.K. downstairs, but on going up to the loft, he discovered a bin in which was some old chop, smouldering.

The fact that there was no breast at the time was a decided factor in preventing the fire, also a twisted axle, while the other car received a front fender.

While the cars were stalled, and the owners in consultation, the Nasadyk car was again run into by a Model T. Ford, inflicting further damage.

Nasadyk had the car taken to Aldie, and came on into town, with the Becker Bros., in the Hamilton car.

For Good Service and Better Coal, Hook-up With US!

### Young Chicago Couple Given Surprise Caravan

It was deep still night all night, on the night of August 14th. Serene in the happiness of his country home, Squire Archibald McFadyen was in preparation to retire for the night. Well the fact is, he had his boots off. Alas, gentle slumbers were not to be his that night, for even as he reached for his boots, from the door, window, nook and cranny, issued a large and varied throng, whooping, yelling, in fact Bedlam let loose.

At first, Archibald thought, well, this is a disturbance from Head-quarters. Others then ask me to take over a Cabinet Post, but he found to his dismay, it was only a gang seeking legal advice.

Upon hearing the request, Donald McFadyen stepped into the breach, to be immediately informed that he was under arrest, or, something like that, and his presence, and that of his Bride, commanded at the Justice Hall, Crossfield.

All good Lawers know it is best to think a lot and say nothing. (Donnie being no exception to this rule,) so Donald accompanied by his young wife and his mother, left the house and entered the palatial Presbyterian Eight Sedan that awaited outside.

It was all over in a second, in fact, before McFadyen, Senior, could ejaculate, "Hi!" the mob had melted away like Roderick Dhu's Clansmen of old, swiftly, secretly, silently.

At the outskirts of Crossfield, the party was met by the DEPUTY DEPUTY DEPUTY DEPUTY SHERIFF, who ordered the prisoners to descend, and by permission of Sir Gilbert Parker, ascended to the "Seats of the Mighty" on the waiting State Buggy (perhaps we should say carriage.) Attached to the shafts of the carriage, were the drivers, the coachman, the footmen, who soon shewed their mettle, and heigh presto, were off in a cloud of dust. (Rain had not fallen at this time, Ed.)

Swiftly through Sulurbia, along McMillions Avenue, up Nickel-Street and Dime Drive, went the dashing conveyance until it had reached the gleaming sign of the Square and Compass. Drawing up with a jerk the steeds stopped, much to the confusion of the driver, and the prisoners were taken through the portals of the Sanctum Dolorans.

Led by Drum Major Corporal Borland, and the Band of the 21st Battalion of Gloomchasers, the couple were marched up to the raised dais, upon which reclined the Laird of Oliver respondent in McFoyon tartan. Rising to his full height (4' 2") he bade the prisoners kneel. Looking over his ever he said, "I will not hold you with preliminaries, thou hast been found guilty by your clansmen, good and true, and for the rest of this evening you will spend it in dancing and making merry." "Rise, I have spoken."

Rising, the young couple were escorted to the "Seats of Honour" by Mandarin Yow Wsh, non-commissioned officers arrayed in streamers.

Just as the alarm was rung, the minstrels of Evan Gordon's Big Ben, tolled out the midnight hour, Governor William Murdoch, M.C., presented Mr. and Mrs. D. P. McFadyen with "This Freedom" (without A. M. Hutchinson's consent) and the keys to our fair City. Unfortunately, Constable Belshaw was using the City Keys for some purpose, so Bill handed over instead, a nicely boxed "Carving Set" specially designed by Lady Hamilton.

Both the Lady and Gentleman suitably repaid to the satisfaction of all. They were adjourned full and free citizens of the Ancient Borough of the Alberta Town of Crossfield, with kind permission of the Board of Trade.

Chef Lim then served Oyster Patties and Champagne (coloured water) finishing with some excellent Blanc Mange.

At 1:30 a.m., Lieut. Colonel Field Marshal Alfred Stevens with acting rank of Bombardier, Officer of the Day, gave the dismissal orders, and the Buglers sounded, "Light out." It had to come as there were no more quarters for

### W.G. Annual Garden Party Successful

The annual Garden Party of the Women's Guild, Church of the Ascension, was held on August 5th at the home of Mr. and Mrs. R. Arnott, with a good attendance of visitors.

Despite the dry season which has prevailed this year, Mrs. Arnott's garden was splendid in colour and as attractive as ever.

The new Rockery created much interest and comment.

Quite a number of outsiders who have not previously attended, were present this year.

In the evening the Mayor and Village Council called and paid their respects.

The Garden party is an annual event and looked forward to each year, but it was unfortunate that a counter attraction this year, prohibited many from attending who would have otherwise done so.

(This article has been held over from last week, owing to being submitted too late for that issue.—Ed.)

### NEW FEATURE STATED SCHOOL TEACHERS NOTE

What is prettier than a Christmas Tree, resplendent in decorations and glowing with electric light bulbs of many colours?

In the past such a tree has been nigh impossible at our Rural Schools Christmas time. Teachers and Trustees, this is a thing of the past. That is, if you call in the Bannister Electric and their new expert workman, Little Joe.

The new service that this firm offers you includes the supplying of the lighting plant and electric lights, and you will find the rental charges extremely reasonable.

In conjunction with this service, can be rented the Electrical Transcription Portable Amplifier, which enables you to have the kind of music you want, just when you want it. Every teacher who has expected the trouble of many little gaps in her programme, and this new service is provided to eliminate just such instances.

It is true that Christmas is quite a long way ahead, but nevertheless, now is the time to give the Bannister Electric a call and discuss this new feature. Naturally, the greater number of schools using it, means the quoting of a cheaper rate than 'if only one or two take it.'

Give the children something new in the annuals of School Christmas Concerts this year, so that they will always recall 1936 as being the outstanding entertainment of them all.

### Village Tax Notices Mailed.

The Tax Notices for the Village have been mailed out for 1936.

No doubt by this time every citizen with property has made a note of the amount to be paid by him.

Being an owner of an estate or home is quite a responsibility these days, with the Mill Rate steadily increasing.

Relief costs are increasing, Public Improvements and Repairs require funds to be maintained, so no one really is to blame, it's necessary, that's all.

The Village are again offering a per cent discount for taxes paid before October 1st, and this is a decided advantage to our taxpayers, and will no doubt be availed of as far as possible.

### WEDDING

ZANG-JOHNSON

A wedding of much local interest took place Wednesday evening, August 12, when Lillian Margaret Johnson, only daughter of Mrs. Louis Overby, Crossfield, was united in marriage to Mr. George Delin Zang, youngest son of Mr. and Mrs. G. W. Zang, Calgary.

The ceremony was solemnized in the Knox United Church, Calgary, with Rev. G. H. Peacock officiating.

Only immediate friends of the couple and members of the respective families were present. Miss Stella Gordon attended the bride, and Mr. Henry Johnson, brother of the bride, acted as best man.

The young couple will reside in Calgary.

the meter, so the gang broke up.

NOTE -- Mi-Lady who usually reports social functions, is on holiday, so we are unable to say what the well-dressed debutante wore.

### NOBODY READS THE PAPER—IS THAT SO?

"Nobody reads the paper, so why advertise?" say some merchants. Yet advertising experts of national concerns, who demand—and get results, yearly give a big share of their advertising appropriations to weekly papers.

"Nobody reads the paper," yet if the editor gets the mumps, the press breaks down or anything else happens to delay the post office and editor are swamped with calls from indignant subscribers.

"Nobody reads the paper," but let the editor misspell one name in an obscure page and 20 readers will "kid" him about it before the paper has been out two hours.

"Nobody reads the paper." Then why do the local publicity bounds bebe the editor for favourable notices? And why are politicians so eager for the support of the paper?

"Nobody reads the paper." Yet the delinquent subscriber squawks to high heaven when his subscription is stopped.

"Nobody reads the paper." Then why in the name of common sense is a man so anxious to keep his misdeeds from being published?—Ex.

### BANK OF COMMERCE MONTHLY LETTER

Forestry and mining continue to find expanding export markets, construction has been active and the tourist trade the largest in recent years.

Drought and excessive heat have brought extensive damage to the crop of two-thirds of the planted area in the Province. Production in the mid and southern Ontario was, however, checked in the latter part of July by rains and cool weather. Eastern Canada and British Columbia have had favourable rains.

### FORTUNATE NEBRASKA

Honda Herald. If the early statesmen of Alberta had been as far sighted as the people who provided the state of Nebraska with its constitution, we would be in splendid shape today. Nebraska's bonded indebtedness to \$10,000,000. At the end of the fis al year that state had nearly \$22,000,000 in cash and gold-edited money, bonds, investments, or any kind of indebtedness, no income tax, the lowest tax levy for state purposes in the United States. Nebraska had further \$100,000 in cash and gold-edited money, bonds, investments, or any kind of indebtedness, no income tax, the lowest tax levy for state purposes in the United States. Nebraska had further

\$100,000 in cash and gold-edited money, bonds, investments, or any kind of indebtedness, no income tax, the lowest tax levy for state purposes in the United States. Nebraska had further

## Age and Mental Capacity

In these days when much is heard of proposals to retire the elderly to allow youth to take their places, the aged and those who have passed what is commonly understood as the years of their prime will derive a good deal of comfort from recent discoveries of eminent psychologists.

In brief, it has been discovered by actual tests, not promulgated as mere theories, that—(1) Mental power does not decline with age, contrary to popular misconception, and (2) That the ability of adults of advancing years to learn new things is almost as great as that of youth.

The first-mentioned discovery, that the mind does not grow old in step with declining physical powers, is the result of tests made by Dr. Irving Lorge, psychologist of Teachers' College, Columbia University, but according to Albert Wiggin, in an article in the Reader's Digest, older people require a little more time than their more youthful contemporaries to arrive at the same mental conclusions, the additional time required increasing somewhat with advancing years. In other words, there is no decline in mental capacity as one grows older, but there is a slowing down in the speed of mental processes.

As the result of a recent revision of mental tests given some years ago to hundreds of people ranging in age from ten to 90 years of age, in which all the tests were limited to time in answering the questions put to them Dr. Lorge found that with a power premium added to compensate for lack of speed the older age groups not only showed no loss of intellectual power but "the people of 50 and 60 had higher scores than those around 25. This increase," he adds, "may have been partly or largely due to the death of the slower and duller people."

When to this discovery is added the findings of Professor Edward L. Thorndike that older people have an great an ability to learn as youth, at least up to the age of 50 and 55, the older generations not only have no reason to believe that they should be "put on the shelf" but have good cause to decide that they are as valuable an asset to society as they were 30 or 40 years ago.

Dr. Lorge's tests resulted in the general conclusion that "adults up to at least 45 can learn new things about as well as young people in their late teens and that, while learning ability seems to decline very slowly from age 25 on, this small decline is offset in many cases by the older persons' interest in the subject, their feeling of its immediate practical value, and other factors, so that the real mental output of people up to 50 or 55 is often greater than that of people of about the same intelligence, working at the same tasks at 20 or 25."

Summing up his own conclusion as the result of his tests, Dr. Lorge said: "As far as mental ability is concerned, there need be no retiring age. The probabilities are that the older a person becomes, the more valuable he becomes. He possesses the same mental power he had in his young manhood plus his wealth of experience and knowledge of his particular job. These are things that no youngster, however brilliant, can pick up. For the same reason there is very definite value to the idea of 'elder' statements' in politics and business."

These findings, it is felt, should result in the re-establishment of confidence in their own powers on the part of the older generations and should serve to remind people of advancing years that there is no occasion for them to retire into their shells under a mistaken impression that they are "back numbers" and that there is no necessity to relegate themselves to mental arm chairs.

On the contrary, the announcement of these proven discoveries should stimulate the older folk, who have already accustomed themselves to the idea that their mental powers are inevitably failing because of advancing years, to again come out in the open and resume the place which their capacities warrant in the life of the family, the community and the nation. No longer need they imagine they are deficient in two essentials of happy and successful lives—mental capacity and ability to learn.

To again quote Dr. Lorge: "As the years advance, we should with quiet confidence, allow ourselves a little greater handicap for time, but as far as mental power is concerned, I believe, we can now be assured that we need not allow ourselves any handicap at all."

### Not An Easy Job

**English Vicar Finds It Impossible To Please People**

Whod be a parson?

Listen to what Rev. C. Paul Glidde, vicar of St. James' church, in the Walthamstow suburb of London, has to say about his job in his parish magazine:

If he is devout he is accused of "spending all his time in that church of his." If he visits his parish he is "always putting his nose into other people's business." If he does not, they say, "we might be dead for all he cares."

If he tries to meet the wishes of his people he "haunts a mind of his own." If he carries out his own policy in his own way he "has no respect for other people's feelings."

There's this to be said about the birthday card you receive from your life insurance company—they send best wishes and really mean it.

If you have anything pleasant to say put it on paper; but quarrels, if we must quarrel, should always be by word of mouth.

### To Study Communications

**Empire Problem To Be Studied By Committee In England**

The whole problem of Empire telegraphic communications will be examined by a committee of the dominions and colonies, under the chairmanship of Sir Campbell Stuart, chairman of the Imperial Communications Advisory Committee, and a native of Montreal.

In an address to the former school of the Royal Empire Society, Edward Wilshaw, chairman of Cables and Wireless, Limited, announced the proposed committee.

Emphasizing that empire telegraphic communications constituted an essential part of the defence problem, Wilshaw pointed out that hitherto the British Empire had predominated in the matter of world communications, but that her position was now being seriously challenged.

There was grave danger, he said, that these communications were becoming wholly uneconomical.

The governments of the Empire had agreed on the formation of the committee, he said, and he was confident a satisfactory solution would be found.

### Biplane Goose Flies High

**Makes Good Use Of Its Double Pair Of Wings**

Emily, the biplane goose, soared over the barnyard of Douglas Sawyer Hermon, N.Y., farmer, using its double set of wings to good advantage.

"Ah, no, missis," he said presently, as his face lighted up, "but we'd gotten some very good feather dusters!"

The bird, exhibited as a gosling at the New York State Fair last year, was sold by poultry experts there to be the only fowl with two pairs of wings to their knowledge. The goose uses both sets of wings to fly. The upper are larger and longer. The second or under pair is much shorter.

Explorers in the Yukon territory, Canada, during 1935, discovered 19 new mountain peaks more than 10,000 feet high.

### Bigest Short Wave Station

**B.B.C. Is Going To Spend \$1,250,000 On Work At Daventry**

The British Broadcasting Corp. will have spent \$1,250,000 in making Daventry the biggest short wave broadcasting station in the world by the end of this year.

Six transmitters and a complicated system of 22 aerials with reflectors will give up to 100 per cent better reception in the more remote parts of the empire than does the existing equipment. A full 24-hour service will be possible if needed instead of the present 17½-hour service.

One of the transmitters radiating two beams in opposite directions will be able to serve South Africa and Canada simultaneously.

The government is determined to encourage the B.B.C. with "The Projection of England." Germany with 18 transmissions a day already has a vast "empire" broadcasting service.

Many of these German programs are in English and are particularly directed to those whom the Berlin announcer calls "Our dear friends and listeners in South Africa." When the B.B.C.'s plans for Daventry are complete Britain will be heard throughout the world at considerably greater strength than Germany.

Every effort is being made to have all six of the Daventry transmitters working at maximum efficiency in time for the proposed world-wide corporation broadcasts.

### Challenge And Opportunity

**Co-operative Movement Offers Opportunities For The Youth**

"I were a young man today and was sincerely interested in agriculture; if I wanted to do a life work I felt reasonably sure of being able to render a real service; if I worked as a capitalist, hardware, inspiring companions, I would associate myself with the co-operative movement."

"A worker in the co-operative movement daily faces both the challenge and the opportunity to render even at every atom of work to the benefit of his speech. Sir Ian Fraser held his finger along the card to give himself his note. In this way he kept his head up, and his voice was not interrupted like those of most M.P.'s when they took down all their cards."

"Economic freedom, spiritual freedom are the greatest possible possessions of the farmer. Regimentation kills freedom. The co-operative movement alone is the means for him to safeguard his freedom"—H. E. Babcock, manager, Co-operative League Federation, Ex-change.

### Canadian Poultry

**Shows Favorable Comment At World Congress At Leipzig**

The Department of Agriculture announced receipt of a cable from the Canadian delegation to the Leipzig, Germany, World Poultry Congress, saying Canada's exhibition of 68 birds had drawn favorable comment from visitors who were impressed by the birds' vitality and liveliness.

Five official delegates from Canada are among those at the congress from 60 nations. The Canadians are headed by F. C. Elford of Ottawa, Dominion poultry husbandman, and former president of the congress, and F. C. Numick, director of publicity and extension of the Department of Agriculture.

### Faderewski In Films

**Reported He Has Consented To Make His Art Available To Millions**

Ignace Jean Faderewski, whose name has been a household word in Canada for nearly half a century, has at last consented to make his art available to millions through the medium of the cinema, it became known.

The master pianist and post-war premier of Polnand is to take part in a film now being made at the Dagenham studio in London.

In the film, Faderewski is scheduled to play Beethoven's Moonlight Sonata, always the piece de resistance in his concert programs, and selections from Chopin's works.

### Biplane Goose Flies High

**Makes Good Use Of Its Double Pair Of Wings**

Emily, the biplane goose, soared over the barnyard of Douglas Sawyer Hermon, N.Y., farmer, using its double set of wings to good advantage.

"Ah, no, missis," he said presently, as his face lighted up, "but we'd gotten some very good feather dusters!"

The bird, exhibited as a gosling at the New York State Fair last year, was sold by poultry experts there to be the only fowl with two pairs of wings to their knowledge. The goose uses both sets of wings to fly. The upper are larger and longer. The second or under pair is much shorter.

### Honor Memory Of Haig

**Vimy Veterans Remember Commander Of British Armies In France**

The ancient abbey at Dryburgh, Scotland, whose ruins have for four centuries looked over the rippling River Tweed, has become a shrine which saw the homage of the government and people of Canada paid to the memory of Earl Haig of Bemersyde, who commanded the British armies in France during the war.

At the same time a wreath of poppies and Canadian maple leaves was deposited on the simple soldier's cross which marks the sepulchre of Haig.

Rev. John Kelman, minister of Fairbank Presbyterian church, Toronto, and national representative of the tuberculosis veterans' section of the Canadian Legion, led the wreath at the special service which was attended by members of the Vimy pilgrimage, representatives of the Canadian government and many Scottish dignitaries.

The Toronto minister recalled the "scurrying attacks" on the memory of Haig by those "who had become bold enough to launch them only when his great soul was silenced forever." These had been met with calmness, with dignity and unflinching courage by Lady Haig, widow of the dead commander.

### Used Notes in Braille

**War-Blinded M.P. Gave Speech In Broadcasting Debate**

It was a surprise to most M.P.'s to see Sir Ian Fraser using notes for his speech he made in a broadcasting debate. Sir Ian is the war-blinded M.P. who was responsible for getting blind people the privilege of free wireless licenses.

The notes he used were embossed on cards in light brown cards rather than playing cards. Each card contained only one or two words as a heading for a section of his speech. Sir Ian Fraser held his finger in front of him and passed his finger along the card to give himself his note. In this way he kept his head up, and his voice was not interrupted like those of most M.P.'s when they took down all their cards.

On the other hand, Major Tryon gave an example of a speech rendered largely inaudible by the use of a manuscript. The Postmaster-General's fault was the more glaring—London Daily Telegraph.

### Anglo-Russian Trade

**Commercial Agreement Establishing Credit For Soviet Orders**

An Anglo-Russian commercial agreement establishing a \$10,000,000 (\$50,000,000) credit for Soviet orders for British exports was announced in London by Walter Runciman, president of the board of trade.

Russian orders are to be placed by Sept. 30, 1937. Runciman said the Soviet trade representative had given formal assurance that Russia intended to place orders up to the full amount of the credit. "The will not, however, include munitions."

Runciman also announced suspension of Anglo-Italian negotiations for the resumption of trade. Italy, he said, was unwilling to accept any arrangement in regard to trade debts which could be considered "adequate."

At the same time Italy is imposing severe restrictions on imports from the United Kingdom, he stated.

### Old Italian Theatre Found

**Contained Relics Dating Back To Time Of The Caesars**

Discovery of an Augustan age theatre, regarded as one of the most important archaeological finds in Italy in recent years, has been announced. Even fragments of the machinery for raising the curtains were uncovered in the well-preserved structures-old building.

It was found on the site of the ancient town of Casinum and among the ruins of the theatre, which was built over the remains of a building of the Roman period.

Casinum was the ancient Italian town where Mark Antony was reputed to have held his orgies and where, at the foot of a mountain, the Romans constructed a still-existing amphitheatre.

### Deer Too Dear

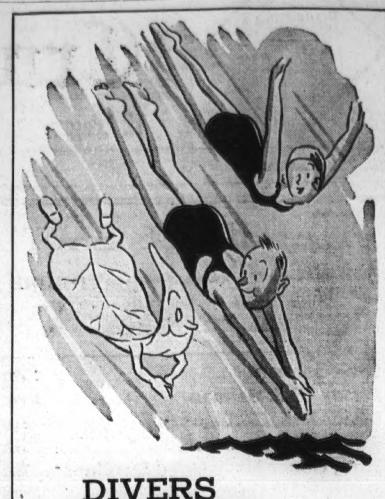

**Deer are far too dear, according to A. Fletcher of Glennmore, who recently applied to the Ontario Department of Agriculture for protection for the animals. Mr. Fletcher**

planted a garden twice the size of his house and salt and pepper to mix with the deer.

He estimated the deer have consumed about 5,000 cauliflower and 3,000 heads of late cabbage.

**May Get Radio Job**

The London Daily Mail said the Marquess of Willingdon probably will be offered, and will accept, the presidency of the British Broadcasting Corporation. The B.B.C.'s new five-year charter comes into operation Jan. 1, 1937. Ronald Collett Norman, brother of Montagu Norman, governor of the Bank of England, is president of the B.B.C. at present.

## DIVERS REASONS

Just try Ogden's Fine Cut and you'll know why "roll-your-owners" are diving into Ogden's, now that better times are here. You can taste the reason! Ogden's IS a better tobacco; it rolls cigarettes that are smoother, and more enjoyable. Next to "tailor-made" there is nothing like the cigarette you roll yourself, with Ogden's Fine Cut and "Vogue" or "Chantecler" papers. Ogden's is Cellophane-wrapped and has the purple easy-opening device.

## OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug.

### Theatres In Russia

**Eleven Thousand Motion Picture Palaces To Be In Operation**

Eleven thousand sound equipped motion picture theatres will be in operation in the Soviet Union by the end of 1936, according to government plans. The number of theatres, cinema picture houses and circuses of all types is expected to reach 44,800, an increase of 8,000 over 1935 figures.

New theatres will be built in Moscow, Leningrad, Alma-Ata, Kaza, Simferopol, Almaty-Ude, Chelyabinsk, Batum, Karkov, Akhhabad and many other cities.

Construction of the country's largest motion picture theatre has been completed in Leningrad. It carries out the traditions of a "movie palace." The facade of the five-story building is adorned with 15 pillars of Kursk granite. The interior of the building is faced with marble and adorned with bas-reliefs.

Seats are provided for 1,500 spectators.

### Just A Point Of View

**Many Would Think Experience Of Girl Exciting Enough**

When Gloria Hollister, the yellow-haired girl who has been nearer the floor of the ocean than any other living woman, came back not long ago from the zoological expedition she headed to British Guiana, South America, she said she had had nothing exciting had happened.

That's all in the point of view, however. Miss Hollister, bred to adventure, thinks little of traveling over hundreds of miles of jungle—some of it never before seen by a white man—in a one-motor plane.

The zoologist, though still in her twenties, is a member of the New York Zoological Society. Once, when the party of 20 was traveling by boat on a lonely river, they discovered, on awakening on shore in the morning, that their boat had been sunk by the swollen torrents and heavy rains in the night. But it was raised and the party continued its journey.

### Peace Garden

**Three Thousand People Gather To Hear Addresses**

An international boundary, 3,000 miles long, dividing Canada and the United States, was pointed to as a monument of peace in a world disengaged and under the dominion of fear.

The reference was made at Boisbriant, Man., by Hon. T. A. Crerar, federal minister of the interior at ceremonies at the international peace garden. More than 3,000 people attended to hear addresses by Governor Walter Welford of North Dakota and Senator Nye of North Dakota.

Steel helmets as part of the regulation equipment of German police when participating in air protection drill has been ordered by the Ministry of the Interior.

### ITCHING

**TORTURE STOPPED by 1936**

For quick relief from the itching of pinpricks, blisters, insect bites, and other skin eruptions, apply Dr. Dennis' cool, antiseptic, non-irritating ointment. Its gentle oils soothe the irritated skin. It relieves and soothes. It dries fast. A 35c tube provides a week's supply. And it's good for the rest of the year.

**D.D.D. Prescription**

## REPORT STATES AID IS GIVEN TO SPANISH REBELS

London.—In a message to the Daily Telegraph from Gibraltar, Sir Percival Phillips, noted newspaper correspondent says he learns from an observer, General Francisco Franco's southern rebel army based at Seville will shortly be supported by a new organization comprising modern German and Italian planes and personnel.

This observer learned from a source he considers absolutely trustworthy that General Franco now has 20 Junker transport planes; five German fighter planes, with original markings erased with black paint, and seven Caproni planes of the type the Italians used with deadly effect in Ethiopia.

Sir Percival's despatch continues the observer also saw a German expert training Spanish gunners in the use of an anti-aircraft gun described to him as of the latest German type. He was told later six of these guns, with a range of nearly 4½ miles, recently were delivered at Seville.

"It was unusual," the despatch continues, "to see one or two Junkers over Seville also on instructional flights." On one occasion he watched three Capronis in perfect formation on a certain alignment which he was told was not usual for Spanish aircraft. He had the impression the greater part of this material and personnel had arrived at Seville only in the last few days as there was a conference at General Franco's headquarters to discuss an aerial offensive against the government forces.

Lord Rothermere's Daily Mail continues its bitter attack on Communist barbarities in Spain. It charges the Madrid government "committed one of the worst crimes in history by arming the scum of Madrid and Barcelona and other Spanish cities, placing deadly weapons in the hands of convicts and, according to some reports, even lunatics." It has thus encouraged ruthlessly gauges to murder and massacre nuns and priests and decent people who happen not to be Bolsheviks."

E. J. Burford, in a letter to the Daily Telegraph from a London address, writes: "I left Barcelona by car and can testify to the extreme courtesy and assistance with which we received from all these 'Bolsheviks' where we were enabled to do the journey to the frontier in 3½ hours. They even went to the trouble of painting protecting letters on the car to save us possible trouble on the road and gave me an armed guard for a while."

Four multi-engined airliners, says the Evening Standard have left London bound for Lisbon and Spain. The machines are:

Two Fokkers from Croydon bound for Lisbon. It is understood they are making for rebel headquarters at Burgos;

Two DH 84 type dragon machines from Croydon airport, bound for Paris. They are believed to be flying to Barcelona for the Spanish government forces.

## Envoy To Spain

Great Britain Makes Surprise Diplomatic Move In Spanish Situation

London.—Great Britain made a surprise diplomatic move in the Spanish situation. G. A. D. Ogilvie Forbes, counsellor of the Madrid embassy, at present in England, is leaving for Madrid as the diplomatic representative of Britain. Forbes will proceed to Marseilles overland, and from there will be taken probably by destroyer to Valencia. Meanwhile the British ambassador to Spain, Sir Henry Chilton, remains at Hendaye on the Franco-Spanish frontier.

No explanation of the move was given in official circles beyond that communications between Hendaye and Madrid were difficult owing to fighting areas lying between and that it was considered desirable to have a more authoritative representative on hand in Madrid. At present the Madrid embassy is in charge of the acting consul with a clerical staff of about 25.

## July Wheat Exports

Ottawa.—Canada's export of wheat during July was almost three times greater in volume and more than three times greater in value than in July, 1935. The Dominion bureau of statistics reported. At the same time a substantial increase was shown in volume and value of wheat flour exported over the same month last year.

## Made Indian Chief

Lord Tweedsmuir Is Accepted Into Cree Brotherhood

Carlton, Sask.—Accepted into the brotherhood. Lord Tweedsmuir, governor-general of Canada, became Chief Okemow. Otaotakewow—"Teller of Tales." There were 5,000 spectators as Chief Sam Swimmer of the Sweet Grass band, nephew of the great Poundmaker, who led the Indian uprising on those plains 51 years ago, placed the feather head dress on the head of the governor-general and placed about his shoulders a fine white caribou skin.

The Indian chiefs also presented Lord Tweedsmuir with a beautifully beaded robe as a coronation gift for His Majesty the King. In addition, they created Prime Minister W. L. Mackenzie King an honorary chief, naming him Oteemew Weewusow—"the Communist."

The visit of the governor-general, Lady Tweedsmuir and their party was a highlight of the two-day celebration to mark the 60th anniversary of Treaty No. 6, signed at Carlton, by which the Indians ceded rights in their lands to Queen Victoria.

Carlton, a fur trading centre of 80 years ago, was the mecca of Indians from distant parts and for several thousand white people who joined with them in marking the anniversary of the historic event.

The solemn, dignified ceremonial, by which Lord Tweedsmuir became a Cree chieftain, was performed in a simple erected with a popular grave for a background. Following the actual conferring of chieftainship and acceptance into the Cree nation, 50 braves staged a pow-wow dance before the platform.

His Excellency addressed a few words to the assembled chiefs in their Cree tongue, then continued in English. In Cree he said: "Brother chief, I am most happy on this occasion. You have done me great honour in taking me into your brotherhood."

## To Invade China

Japanese Troops Reported To Be Ready To Advance

Shanghai.—Reinforced Japanese troops, it was reported here, are preparing for a fresh invasion of Chinese provinces in inner Mongolia—adding new tension to strained relations between Japan and China.

Although a Japanese spokesman at Tientsin denied contemplated participation in events in inner Mongolia, various newspapers here asserted that all this "bloodshed" in Manchukuo, had joined the Japanese forces at Dolonor.

Large numbers were concentrating at Shangtu, West Chabot in preparation for a fresh invasion of the East Suyuan province, it was asserted here.

The Tientsin spokesman for the Japanese attributed the strife in Mongolia to banditry, admitted the situation was complicated but asserted he was unaware whether two Japanese regiments had departed toward Chinghai. The Chinese-Manchukuo military pact, he asserted, does not provide for military assistance beyond the Manchukuo border.

Foreign observers, watching the clouds of dissension gathered, believed serious action might result.

## Would Not Return Land

South Africa Cannot See Britain Giving Colonies Back To Germany

Johannesburg, South Africa.—"In no circumstances can South Africa or Britain envisage the return of either Tanganyika or Southwest Africa to Germany," declared Oswald Pirow, South Africa defence minister, in a speech before the United Party executive here.

"Some diplomacy other than giving back Tanganyika and Southwest Africa must be found to satisfy Germany's colonial aspirations," the minister added. "We are working hard with the rest of the people to implement a common defence policy and South Africa will be an older brother to the rest of British Africa."

## Drowned On Vacation Trip

American Professor Meets Death In Rapids Near Arctic

Edmonton.—A Dominion Airways aeroplane was standing at Athabasca Falls, the body of Dr. James Ellmer Leslie, Fuller, 53, Chicago, to civilization. The Northwestern University professor was drowned in rapids near Athabasca while on a northern canoe trip with his two sons and two friends.

Edmonton officials of the aviation company said that the body of the professor had been carried by relatives from Dawson City, only 500 miles from Athabasca, instead of to Edmonton, as originally expected. Athabasca is 1,800 miles from Edmonton by air.

## Canada's New Coins

Latin Phrases May Not Be Included In Design

Ottawa.—Latin inscription may disappear from Canadian coins at the end of the year. New designs, necessitated by the death of King George, will be made soon after Prime Minister Diefenbaker returns from Europe, but will be issued four months before the issue of new coins bearing the head of King Edward.

No decision has been made on the dropping of Latin phrases which date back through the centuries to the time it was a live language in Europe.

## Treaty With Uruguay

Agreement Designed To Develop Trade With Canada

Ottawa.—Exchange of most favored nation treatment in tariff matters is provided in a trade agreement between Canada and Uruguay signed in the name of Prime Minister MacKenzie King.

The agreement designed to extend and develop trade between Canada and Uruguay, was designed by the prime minister on behalf of Canada and by Senor Don Mateo Marques Castro acting on behalf of the government of Uruguay.

Premier John Metaxas, strong man of Greece, who became Dictator when martial law was declared to quiet revolutionary disturbances described by the government as resulting from a Communist-promoted strike.

## Grecian Dictator

Premier John Metaxas, strong man of Greece, who became Dictator when martial law was declared to quiet revolutionary disturbances described by the government as resulting from a Communist-promoted strike.

## Selassie Is Hopeful

Believes He Can Re-establish His Ethiopian Kingdom

Bath, England.—Emperor Haile Selassie is resting at this seacoast resort, hoping some day to re-establish his Ethiopian kingdom.

The negus apparently is more cheerful than at any time since the League of Nations gave a cold shoulder to his plea for financial assistance. He has taken heart, his spokesman said, by reports that remnants of his armies are operating in western Ethiopia and hope to retake Addis Ababa.

"We are in a strong position with an established seat of government at Gore," the negus' representative asserted. "The chief difficulty is that we are unable to import munitions."

The negus, who sought refuge after the diplomatic defeat at Geneva last month, planned to remain several weeks more formulating a program of action and await developments in Ethiopia. He is not going to America in search of sympathy, his representative said, but there was no definite assertion he had abandoned plans for the trip entirely.

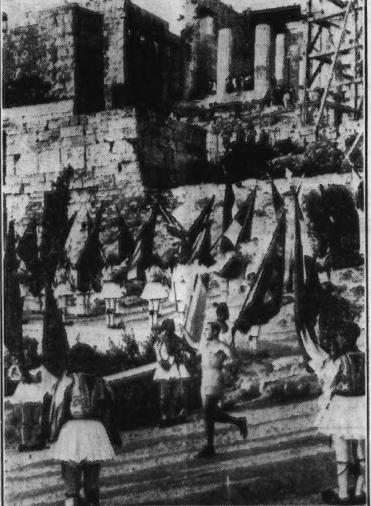

## Must Be Quarantined

Manitoba Adopts New Regulations To Fight Infantile Paralysis

Winnipeg.—Quarantine regulations for infantile paralysis were adopted by the Manitoba government, in cabinet session, on advice of Hon. I. B. Griffiths, minister of health and public welfare.

The new regulations include placarding premises when the patient remains there. Food-handlers are forbidden to engage in their occupations within 14 days of their last exposure to infantile paralysis infection.

## THE OLYMPIC FLAME

A runner leaving the Acropolis at Athens, Greece, with the torch whose flame was carried by relays of runners across Europe to Berlin for the opening ceremony of the Olympic Games. Note the Greek Guard of Honour in their picturesque costumes, holding flags of the 52 natives taking part in the games.

## Bear Name Of King Edward

Officials Have Renamed Island And Harbor In Yugoslavia

Sibenik, Yugoslavia.—An island and harbor, in Yugoslavia, bore the name of King Edward as His Majesty cruised in vagabond style along the Dalmatian coast.

The King abandoned his nautical vacation for a time to go ashore at Rab where he purchased do's in native clothing, visited the market with the shopkeepers and refreshed his memory of the locality's history.

Officials renamed Kuki Otok King Edward Island and gave to Tejar harbor the King's name.

Early in the day the royal yacht Nahn steamed away full speed for Starigrad, 25 miles north, where the King was declared to be planning a deer hunt in the Velebit mountains.

Wherever he appeared—and was recognized—he received cheers from the populace. At one stop, however, fisherman were not aware of his identity, developing a naval officer from a passing ship.

The King fished until midnight and caught two large "dentaliach," weighing approximately eight pounds.

## First Boat At Churchill

Wentworth Arrives With Heavy Cargo For Prairies Centres

Churchill, Man.—Activities at this northern port on Hudson Bay got full swing with the arrival of the steamer Wentworth. The Wentworth docked August 10.

The steamer had 3,000 tons of general cargo to discharge here, including coal for Churchill and other northern points, large castings and steel grinding balls for mines in northern Manitoba, glass and other merchandise for prairie centres.

Captain L. Graves, a veteran of the Churchill route, reported a quiet voyage from England with a delay of one day owing to fog. The Wentworth began loading about 310,000 bushels of wheat for Europe.

## Plan United Kingdom Tour

Two Canadian Motorcycles May Make Trip Next Year

Ottawa.—Hector K. Carruthers, secretary of the Ottawa Board of Trade, disclosed that preparations are under way for two Canadian motorcycles to tour the United Kingdom next year, one starting from Ottawa at the time of King Edward's coronation.

Carruthers said it was planned to limit each tour to 25 days. Canadian motorists will return visits paid to Canada this year by three British motorcycles of which one has completed its itinerary.

According to the province's offer, the city of Edmonton would agree to purchase \$55,000 worth of certificates with the cash grant. The province would give the city an additional \$30,000 in certificates which Edmonton would guarantee to keep in circulation for the next two years or in effect until the certificates had expired.

Declaration "the Alberta prosperity certificates are not authorized by the Social Credit Measures Act and are ultra vires of the province of Alberta," was asked in Mr. Watson's statement of claim.

Mr. Watson, K. Carruthers, solicitor for Mr. Watson, said the claim of illegality is based on the ground that the issue of certificates violates the British North America Act rather than the Canada Bank Act. The certificates are ultra vires of the province because the province attempted to handle currency or money, which is outside the powers of the province, Mr. Grant said.

Declaring that by the scheme endorsed by city council, Edmonton agreed to accept \$30,000 in certificates from the province, the court said the certificates are not redeemable for two years after the statement said the certificates are not issued by law two-thirds of the burgesses must assent in contracting any city debt not payable within the current year, "and the effect of the agreement is to make the city liable for a debt not payable within the current year."

When asked to comment regarding the injunction, Mayor Clarke said he would call a special meeting of the city council to decide on what action was necessary.

"We are getting \$30,000 to help the relief situation and when these men apply for an injunction like that they are getting scandalously against the best interests of the city," said Mayor Clarke.

"They are just trying to create more trouble to follow up the trouble they created when they were in power. They are going as far as they can to bring disgrace on the city."

## Devastated By Fire

Location For "The Great Barrier" Film Swept By Flames

Revelstoke, B.C.—One of the most beautiful spots, used a short time ago as the background for the Gaumont British motion picture, "The Great Barrier," was devastated by fire.

When the name of "the great barrier" was applied to the steep, rugged slopes of the Columbia canyon at Silver Tip Falls, eight miles from here.

The blaze was started stoked by a careless cigarette smoker. A wooden platform used to obtain a view of the falls was destroyed. Only a blackened mountain side remained, and the fire, fought by a large force of men, was licking its way through the timber toward the higher reaches of Mount Revelstoke.

A powerless locomotive on the Great Western Railway has been named after King Edward, with His Majesty's consent.

## WOULD RESTRAIN EDMONTON CITY FROM USING BONDS

Edmonton.—Restraining the city of Edmonton from accepting or undertaking to accept "prosperity certificates" from the Alberta government, an interim injunction was granted here by Mr. Justice T. M. Tweedie of the Alberta supreme court.

Ronald Hannan Watson, Edmonton mining engineer, "suing on his own behalf as well as other burghes of the city," asked for the injunction in a statement of claim. Defendants named were Mayor Clarke of Edmonton, City Clerk Alfred Russell and Hon. J. W. Hugill, K.C., as attorney-general of the province.

"The city of Edmonton" is prevented by the injunction from any agreement with "the government of the province" whereby the city of Edmonton would undertake to accept "prosperity certificates" from the government or persons until the trial of this action or until further order."

The injunction does not restrain citizens of Edmonton from accepting certificates.

The injunction barred Edmonton from signing an agreement with the province whereby the government would have given the city \$85,000 in certificates in lieu of the \$55,000 August cash relief grant expected. City council agreed to accept the proposal.

According to the province's offer, the city of Edmonton would agree to purchase \$55,000 worth of certificates with the cash grant. The province would give the city an additional \$30,000 in certificates which Edmonton would guarantee to keep in circulation for the next two years or in effect until the certificates had expired.

Declaration "the Alberta prosperity certificates are not authorized by the Social Credit Measures Act and are ultra vires of the province of Alberta," was asked in Mr. Watson's statement of claim.

Mr. Carruthers, solicitor for Mr. Watson, said the claim of illegality is based on the ground that the issue of certificates violates the British North America Act rather than the Canada Bank Act. The certificates are ultra vires of the province because the province attempted to handle currency or money, which is outside the powers of the province, Mr. Grant said.

Declaring that by the scheme endorsed by city council, Edmonton agreed to accept \$30,000 in certificates from the province, the court said the certificates are not redeemable for two years after the statement said the certificates are not issued by law two-thirds of the burgesses must assent in contracting any city debt not payable within the current year, "and the effect of the agreement is to make the city liable for a debt not payable within the current year."

When asked to comment regarding the injunction, Mayor Clarke said he would call a special meeting of the city council to decide on what action was necessary.

"We are getting \$30,000 to help the relief situation and when these men apply for an injunction like that they are getting scandalously against the best interests of the city," said Mayor Clarke.

"They are just trying to create more trouble to follow up the trouble they created when they were in power. They are going as far as they can to bring disgrace on the city."

**Today's Thought**

Faithful are the wounds of a  
friend; but the kisses of an enemy  
are deceitful.

**Between Ourselves**

**School Fair**

The School Fair will be upon us  
in about three weeks, and it is  
anticipated that this year the show-  
ing will be greater than ever.

Trustees, Teachers, and Parents  
give this project their full and  
loyal support. By so doing, we  
are not only supporting those  
young men who are trying to make  
the Fair a success, but at the same  
time stimulating in the children  
the urge to do something worth-  
while.

Let's get behind this project  
"FOLKSES" and make 1936  
School Fair a real success.

**Changes**

Of late, there appears to be an  
ever changing of the personnel of  
our fair Village, departures and  
arrivals being the order of the day.  
new faces for old ones.

In our columns last week we re-  
ferred to R. M. McCool's departure,  
and when it is realized just how  
long Milt has been part and parcel  
of our Community, it will come  
home to us how much he is going to  
be missed.

Ever active in local affairs, he  
leaves a niche that is going to be  
mighty hard to fill, in fact, his de-  
parture is a distinct loss to the  
community and Village.

Yielded:

"The old order changeth,

Yielding place to the new."

Mr. McCool's continued success  
is wished for, and the Chronicle and  
its many friends hope that as the  
distance between us is not so very  
great, that he will be with us occa-  
sionally at some of our numerous  
annual community affairs.

**Occasional Notes**

**the Study Window**

By Rev. A. D. Currie

**Drought**

In Genesis we read, "The fruits  
of the Earth in their season" and  
they surely come. This year the  
unprecedented drought practically  
the whole of central North America  
has somewhat marred the fruits  
The movies have shown grain a  
foot high and stock turned into  
green fields for pasture.

It's a strange spell of weather, un-  
precedented in the life of time and  
in the breadth of the country it  
is attacked. It indeed takes the  
faith of a Habakuk to sing under  
such conditions.

"By their fruits ye shall know  
thee," the Standard of  
judgment, and it is to be known.  
We are not to draw our conclusions  
from a seed catalogue, but from  
our own gardens and fields. This  
we accept readily in the life of  
nature, but are not so apt to apply it  
in the realm of life. Men are to  
be judged not by their professions  
but by their character, not by their  
theories, but by their lives.

It's a very simple and reasonable  
principle which Christ proclaims  
For He said again, "Men do not  
gather grapes of thorns nor figs of  
thistles."

What is the fruit of my life and  
yours?

The happiest road to contentment,  
we find

Is a path that is paved with a  
memento of mind.

If we love a sunset, the mountains  
and a river.

Then the rich earth is ours, although  
wealth pass us by.

When a tree is a friend, if our hearts  
are attuned

To the hush of the twilight, the  
magic of moon.

And the earth is an altar with  
candles alight

When myriad stars fringe the  
curtain of night.

Willa Hoey.

**MADDEN NOTES**  
From Our Own Correspondent.

Miss Violet Poffenroth is spending  
a few days in Calgary.

Miss Isabella Leask is visiting at  
Olds.

Miss Mary Poffenroth returned to  
her home after visiting friends  
near Kootenay.

Miss Dorothy and Lucille Robison,  
returned to their Madden home  
having attended summer school.  
They have since left on a trip to  
Yellowstone Park.

Miss Marion Ingham spent the  
last two weeks vacationing at  
Waterton Lakes and vicinity.

Harley Walsh has accepted a  
position on a "Dude Ranch" near  
Toronto.

Miss Lol McEachern is visiting with  
Miss Hazel Havens.

**WEDDING**

**McCULLOUGH - LANDYMORE**  
The Calgary Prophetic Bible  
Institute was the setting for an  
attractive Wedding on Thursday  
July 23, at 3 p.m., when Muriel  
Alberta, youngest daughter of Mrs.  
E. Landymore, of Crossfield, became  
the bride of I. Henry McCullough,  
of Penhold. Rev. M. N. Burgett  
officiated.

The bride looked charming in a  
white crepe suit with a dainty pic-  
ture hat to match. She carried a  
bouquet of roses and fern, and was  
escorted in the church on the arm  
of her brother, Winfield Landy-  
more, of Crossfield, who gave her  
in marriage. Miss Jean Doherty  
sang the Bridal Chorus from  
Lohengrin.

Mrs. Lilian Landymore, sister of  
the Bride, preceded her down the  
aisle, looking lovely in a yellow  
silk dress with yellow hat and carried a  
sheaf of yellow wheat. Miss Helen  
Horn, niece of the bride, was a  
sweet little flower girl with a  
bouquet of sweet peas. Mr. Ed-  
ward Philips, supported the groom.  
During the signing of the register,  
Mrs. I. Landy, of Innisfail, sang  
"Promises Me."

After the wedding ceremony, a  
reception was held at the "Tea  
Kettle Inn" for about thirty guests.

The couple left for Waterton  
Lakes, where they spent their  
honeymoon. The bride chose a  
smart triple sheer brown ensemble  
with accessories to match for travel-  
ing.

Miss Landymore was a resident  
of Crossfield district until 1927,  
when she entered the Holy Cross  
Hospital, Calgary, for training. In  
1931 she was admitted to the staff  
of the Innisfail Municipal Hospital  
and has served there as R. N. until  
the time of her marriage.

This item just received, but we  
trust will still be of interest.

**School Fair Jottings**

By "Seedling"

This week we must appeal for  
help for the Boys and Girls Calf  
Club.

Everyone will agree that this is  
a really worthwhile affair, and one  
which all of us should do our best  
to keep alive. In the past we have  
had good calves which have brought  
favorable comment from the judges  
and good prices from the buyers,  
and this year there are more and  
better calves than in any previous  
show.

We have in the past been very  
anxious in the matter of prize  
money, by way of calves donated to  
us, and the proceeds from the sale of  
these making substantial prizes for  
the competitors.

However, it would be abusing  
any man's generosity to expect him to  
do this for us, no matter how enthusiastic  
he may be.

There may be others in the com-  
munity who can help us out with  
either calves or cash, and Secretary  
May would be more than pleased  
to hear from them.

## Big Annual Savings To Poultrymen As Result Of U. S. Experimental Work

Savings of millions of dollars annually will accrue to poultrymen if experimental work by United States government scientists develops as expected.

The experiments have been conducted by H. C. Barott, agriculture department poultry technologist, over a period of 15 years and are said to have resulted in finding the optimum of favorable condition under which eggs should be hatched.

For years, Barott has worked in his extensive laboratory at the Beltsville, Md., experimental farm with "calorimeters" in which he could measure exact air conditions—the amount of humidity, gaseous air contents and temperatures—so that over a long period he could determine what air conditions were best suited to hatching.

The results of his experiments are to be published in a detailed technical report, scheduled to be off the presses in about two months.

Roughly, however, his experiments have shown that the ideal hatching conditions are: Temperature, 100 degrees; humidity, 60 per cent; and gaseous makeup of the surrounding air, one-half of one per cent, carbon dioxide and 21 per cent, oxygen.

Barott experimented with temperatures ranging all the way from 90 degrees to well above 100 degrees; with humidity ranging from 8 to 87 per cent; and with various percentages of air, less than one-half of one per cent, carbon dioxide and 15 per cent, oxygen to 10 per cent, carbon dioxide and 50 per cent, oxygen.

He worked with 100 eggs for each of his experiments. Highest percentage of chicks he obtained from a single group was 95, but this was exceptional. He considered 80 chicks out of 100 eggs good, and thought such a percentage would justify his long years of work.

Normal lengths of time to hatch chicks is 21 days. Barott found that raising the temperature slightly would shorten this incubating period by 24 to 26 hours, but that raising the temperature just 1 per cent would result in reducing the quality of the chicks by 20 per cent. Therefore, he concluded, it would be far wiser not to attempt to speed up incubation.

The "respiration calorimeters" with which Barott works are specially-designed incubators in which all conditions can be regulated to the nth degree. Special electric grids allowed him to keep the temperature at exactly the point he wished it, an unusual air makes possible to take exact measurements of air conditions and keep them at whatever point he wished.

They explained that few persons had gone into the question seriously enough to devote years to the problem, and that if Barott's findings were put to actual use, poultrymen undoubtedly would find they were producing a better quality chick as well as getting a larger percentage of chicks.

Some new type incubators, they said, in which the eggs are kept in tiers of shelves, probably can be adapted to most of Barott's findings, but much difficulty because air conditions can be controlled within the tiers. But small dealers, who have old-type equipment and do not operate on an extensive scale, probably will not be able to put the findings into practice, they pointed out.

### Nicely Put

A man and his wife had enjoyed their previous holiday on a farm so well that they wished to repeat it.

The only thing that made them doubtful was that they had been somewhat annoyed by the close proximity of the pigsty to the house.

Finally the man wrote to the farmer and explained the objectionable feature.

He received the following reply: "We haven't had any pigs on the place since you were here last summer. Be sure to come."

### Settled For Him

A group of men were discussing evolution and the origin of man. One of them remained silent, when a companion turned to him and demanded his opinion.

"I ain't goin' to say," he replied, "I remember as 'ow Henry Green and me thrashed that out once before, and it's settled as far as I'm concerned."

"But what conclusion did you come to?"

"Well," he said slowly, "we didn't arrive at the same conclusion—no, we didn't. Henry arrived at the 'ospital an' me at the police station."

### Analysis Basis Of Fertilizer Value

#### Farmers Should Be On Guard Against Inferior Products

Despite many sellers talk to the contrary, the main basis of value of a commercial fertilizer is its analysis in plant food, that is its nitrogen, phosphoric acid or potash content. It frequently comes to the notice of the Fertilizers Division, Seed Branch, Dominion Department of Agriculture that salesmen, in those parts of Canada where fertilizers are not well understood, try to sell fertilizers that are not eligible for sale under the Fertilizers Act, or offer a low grade at about the same price as a higher grade fertilizer. Farmers and other buyers should be on guard against this.

For example, a superphosphate containing 35 per cent, available phosphoric acid is worth proportionately less than one containing 20 per cent, and the triple superphosphate containing 48 per cent, available phosphoric acid has more than twice the content of plant food, and, therefore, in dollars and cents is worth more than twice as much as the 20 per cent, superphosphate per ton. Each of these grades of superphosphate is being offered for sale in Canada at the present time, and should be bought on the basis of its available phosphoric acid content, and not just as fertilizer.

The same basis of selection should be employed for all other fertilizers whether they be mixture, or single materials containing one of the three main plant foods, nitrogen, phosphoric acid and potash. Whenever doubtful as to the value of a fertilizer, buyers should communicate with officers of the Dominion Seed Branch, which enforces the Fertilizers Act.

### No Set Study

#### Teachers Oppose Dominion-Wide Curriculum For Canadian Schools

Teachers will not endorse the study of a Dominion-wide curriculum for Canadian schools at the present time. This decision was reached at the 15th annual conference of the Canadian Teachers' Federation held at Saskatoon. There was little discussion of the question.

Another resolution called upon the executive of the federation to seek teacher exchange arrangements with school boards in the United States. The suggestion was that plans similar to present empire exchange agreements be worked out.

A resolution arising out of a recommendation of the president that an honor roll for teachers who had performed meritorious public service be instituted, was looked upon with disfavor by most of the delegates and was voted down. The question was then ordered struck from the minutes of the conference.

The question of national scholarships was re-introduced and two resolutions, one referred to the federal government and one directed to the provincial governments were introduced and unanimously approved.

### Could Be Used Today

#### Marble Cocktail Bar Has Been Found In Roman Ruins

Archaeologists have given the tourist agencies a real "talking point" in the effort to attract visitors to Ostia Antica, the ancient imperial seaport of Rome.

Years of propaganda had failed to bring visitors to see Ostia's interesting ruins and art treasures, but now—a bar has been unearthed! It is of marble, the same height as the usual soda fountain or cocktail bar, and with a little plumbing could be used today.

Besides numerous shelves and boxes for the amphoras of liquor, the bar has two spacious cavities—one of which has been converted to a safe and the other for a boiler.

Near the bar was found a statue of Hygieia, goddess of health—to whom, no doubt, patrons of 2,000 years ago raised many a beaker.

### Good For Many More

The retirement of Sir William Mulock from the post of Chief Justice of Ontario at the age of 92 recalls a story which was told some three years ago when it was proposed to make him Lieutenant-Governor of Ontario. He was then approaching his 90th birthday. "That's only for four years," he exclaimed. "What would I do after that?"

"I ain't goin' to say," he replied, "I remember as 'ow Henry Green and me thrashed that out once before, and it's settled as far as I'm concerned."

"But what conclusion did you come to?"

"Well," he said slowly, "we didn't arrive at the same conclusion—no, we didn't. Henry arrived at the 'ospital an' me at the police station."

One of the things you can't buy on credit is experience.

JACK LOVELOCK

### Religion In Greenland

#### Country Claims To Be Hundred Per Cent Professing Christian

Hans Egede, the Apostle to Greenland, was born on January 31st, 250 years ago. Greenland is one of the successful mission enterprises of the Lutheran Church. Every year, on All-Saints' Day, every congregation in Greenland celebrates the memory of Hans Egede and at Godthaab, there is a fine granite monument erected in his honor. It is reported that Pentecost Day, May 20, 1934, at Cape York, the entire population of the whole land was baptized, so that the country is 100 per cent, professing Christian. Since Greenland belongs to Denmark, the Greenland Church is under the Bishop of Copenhagen. A provost is stationed at Godthaab and a vice-provost farther north. Seven Danish and fifteen Eskimo pastors are in charge of ten parishes in the west, two in the east, and one at Cape York. The country is so large that the parishes are from 150 to 200 miles each way. Church attendance is good, the people are thrifty and happy, the are literate, and have schools, including normal schools and seminaries. Sunday schools and young people's societies, Religion is taught in the public schools besides.

### Honest Labor Pays

#### Search For Easy Way Of Living Ends In Failure

Diligent labor in any honest calling is infinitely more profitable than chance hunting for hidden treasures. Those who are given over to hopeless poverty, both mental and material, are commonly to be found, not among the men who do hard labor for their daily bread, but among those who spend their time in moving aimlessly about all sorts of out-of-the-way places, in the hope of some day lighting upon an unearned fortune. Kind of fortune that does not often turn up; and when it does turn up, it is not usually to the best gain of the finder. Hard work, honest and care which some people expend in looking for great good fortune which never comes, would be enough, if directed into a proper channel, to give them a chief share of the good which now seek in vain. Honest work never fails to pay, and is the only kind of work that does pay.

### Means A Whole Lot

#### Personal Appearance Has Much To Do With Success

In London recently 20 unemployed women were paid to be beautiful. A beauty specialist, who taught them the art of face and make-up, and she sent a call to the unemployment office for twenty girls. The fitting for 25 cents an hour for undergoing from 16 to 24 treatments—an easy way of making a living.

But the best part of the story has yet to come. When the girls started on their hunt again for jobs they found their improved looks a big aid. One woman received an offer of marriage and her daughter, also out of work, received a film contract; a woman who was 41, looking about thirty now, obtained a new job quickly. Many others had success in getting employment. So after all, one's personal appearance means a whole lot. —St. Thomas Times-Journal.

Russia twice has tried to mint platinum as the national coinage but abandoned both attempts.

### Smart Pull-ons Crocheted Lengthwise

PATTERN 5676

Here's joy for you—easy in the making—pleasure in the wearing. These gloves are crocheted—not round and—lengthwise. Two identical pieces are simple stitched and whipped together with contrasting yarn—in itself a decoration. They fit so smoothly it's a delight! Make them in yarn or string. In pattern 5676 you will find directions for making these gloves; an illustration of them and of all the tools needed; materials required.

For this pattern get 20 cents in standard or coin (coin preferred).

To Household Arts Dept., Winnipeg Newspaper Union, 176 McDermot Ave., Winnipeg.

There is no Alice Brooks pattern book published.

## Sir Herbert Ames Expresses Confidence That The League Will Come Back

### Farm Has No Soil

#### Fertility And Nutrient Provided By Vial Of Chemicals

A laboratory farm that needs no soil but gets its fertility and nutrient from a vial of chemicals was exhibited at Berkeley, Cal., by Prof. W. F. Gercke, University of California experimenter.

Dust storms, drought, unseasonal rains, hail and insect pests are blamed to Prof. Gercke's futuristic ranch. The farm not only needs no soil, but has no use for rainfall and requires very little space. It holds the answer, the Berkeley scholar believes, to all the problems that worry the American farmer.

Prof. Gercke picked a tomato as red and as juicy as a county fair prize exhibit from a vine that has its roots in sand.

He plucked a large white gardenia, perfectly formed and fragrant from a plant that sprouted from a tank of water.

Prof. Gercke visualizes complete large scale farming in which crops will be grown in shallow water tanks, protected by wire netting.

The danger of soil exhaustion, now a major problem in American agriculture, would be eliminated by the simple expedient of replacing used chemicals in the water with fresh supplies.

Seeds would be sown in a bed of sandust or excisor placed over the tanks, their roots taking the nutrient from the water below.

### Gangster Of Tree World

#### Fig Tree Native Of Florida Strangled By Vines

A gangster of the tree world is described by Dr. John K. Small, chief research associate of the New York Botanical Garden. This tree is the strangling fig tree, and in this country is native to Florida. Its botanical name is *Ficus aurea*. The fitting climax to the career of this gangster tree comes when, after strangling another tree upon which it was a parasite, it then strangles itself.

Not the least peculiar fact as to the strangling fig tree, states Dr. Small, is that it can live a simple life anchored in the ground, entirely independent of other trees. It can, however, change over and become a parasite and attach itself to another tree, and she sent a call to the unemployment office for twenty girls, the fitting climax to the career of this strangler tree upon which it was a parasite, it then strangles itself.

Even a giant live oak is its easy prey. When it starts its parasitic growth its root spreads around the trunk of the host tree like a grapevine tendril, and then a multitude of evergreen roots on the host tree. In some cases these roots reach out to neighboring trees, and it may transfer itself from the first host to the second one. Any tree upon which the stranger takes root is doomed. Even a giant live oak is its easy prey. When it starts its parasitic growth its root spreads around the trunk of the host tree like a grapevine tendril, and then a multitude of evergreen roots on the host tree. In some cases these roots reach out to neighboring trees, and it may transfer itself from the first host to the second one. Any tree upon which the stranger takes root is doomed.

Five buffalo for Prince Albert National park arrived by train from Elk Island park, in Alberta. A paddock has been prepared for the animals.

Institutions for the mentally defective controlled by the London county council will no longer be called "mental hospitals", but simply "hospitals".

Half the labor of cutting a field of grain will be done away with if the automatic "stoker," manufactured by Henry Smith, 82-year-old Toronto inventor, comes up to expectations.

Canadian exhibitors at the Foreign Congress at Leipzig, Germany, have donated to the Leipzig Zoological Gardens a number of excellent specimens of Canadian fowl, it was announced.

Forsters spent too much time in boulders hitting at little white pillars with nibbles and not enough time with their children, says Judge John F. McKinley, of Ottawa, chairman of the Ontario parole board and authority on domestic relations.

Canada may look forward to new trade agreements with New Zealand, W. J. Jordan, high commissioner for New Zealand, said. He was in Toronto on his way to London to assume his duties as successor to Sir James Parr, whom terms of office expire shortly.

A live anti-aircraft shell about 10 inches long was unearthed in a garden at Norbury, England. It is believed to have been fired when a Zeppelin bombed the district in 1915.

After 35 years in the royal household, H. Barratt, who weighs 240 pounds and is six feet, three inches in height, was retired on pension. He was known as "Jumbo."

A primitive Indian grave over 100 years old was uncovered on the east bank of the Red River by workmen digging an excavation for a house. The skeleton is of a young boy, buried in the conventional position, on his side with head and knees touching. His knife and an iron for striking flint were beside him.

### Were Seeing Things

Actresses Report Strange Happenings At Village In India

Charges made by two actresses have sent the police of Nowabash, India, on a "ghost" hunt. The actresses declared that when they returned home after the evening performance an old fakir standing at the foot of the stairs beckoned them to follow him upstairs. "When they reached him he told them to leave his place were two cats with 'sparkle shooting out of their eyes.' The women looked out of the window, and were horrified to see a young man hanging from a roof and shouting that he was being murdered. They dashed down to help him—only to see him jump down, "and disappear into thin air." This was enough for the two actresses. They called in neighbors as protection, packed their things and left for quiet lodgings.

### Recovered Lost Purse

B.C. Woman Was Happy To Find Contents Intact

E. A. Cook, a jockey at the British Columbia racetrack, picked up a purse and, without opening it, put it to one side until someone claimed it.

An hour later a woman appeared, rushed about frantically, looked behind museum case and eventually approached Cook.

"Is that what you are looking for?" he asked, producing the purse.

"Yes," she said, and opening the purse, pulled out a roll of money and counted it.

"That's right, \$915," she said, "thank you," and walked out.

"After another season," said Farmer Corriveau, "I guess we'll have a chef for the summer boarders."

"What's a chef?" asked his wife.

"A chef is a man with a big enough vocabulary to give the soup a different name every day."

On an average, women are said to live longer than men, because they live quieter lives and do not take so many risks.

### Empire Shipping Lines

Sir Edward Beatty Is Organizing To Meet Competition In The Pacific

Reports that empire shipping lines in the Pacific are getting together under the leadership of Sir Edward Beatty, president of the Canadian Pacific Railway, and are organizing to meet foreign competition are discussed in an editorial in the London Daily Mail.

"This would indeed be a welcome step," says the newspaper. "Sir Edward Beatty is known the world over as president of the famous Canadian Pacific Railway and is probably the foremost business chief in the British empire. When he takes an affair in hand he never fails to carry it through. In this case there is a special need of initiative and energy such as he possesses in such a high degree."

"Four years have elapsed since the British government promised the British lines support in the face of the competition of American vessels," it continues. "These latter have received large subsidies and also have as an aid the coastal reservation which closes to British liners the trade between such points as the United States and Honolulu."

"The British government ought therefore to grant a very handsome subsidy to the British lines to equalize the position. It is now or never if the British lines are to be saved as their reserve funds are exhausted. 'If Beatty can infuse 'pep' into the British lines, he will be able to make them compete and secure an adequate British service in the Pacific he will have made yet another immense contribution to the welfare of the British empire."

### Seaside Resort For Workers

Nazis Planning Colossal Playground Exclusively For Working Class

A "colossal" seaside resort exclusively for the working class is being conjured up by the Nazis from a lonely strip of beach between Blinz and Sassnitz, on the island of Ruegen, in the Baltic Sea. Twenty thousand factory girls, miners, workers, kitchen maids, farm-hands, painters, cobblers, plumbers, engine drivers, trainmen, sailors, their wives and children, will live in 3,350 rooms all facing the sea. Each day about 3,000 workers will arrive and 3,000 depart, each group staying 10 days. Thus in five months 300,000 are to be accommodated.

They will eat 80,000 rolls and 25,000 pounds of bread a day which will be baked in their own bakery. A private laundry will wash 16,000 pounds of laundry daily. Meals will be served in 10 gigantic "food houses."

The beach has a length of five miles of which more than three miles will be equipped with promenades, cafes, resting places, etc. A pier 2,250 feet long will be built.

### Cosmic Rays

Huge Electrical Machine For Controlling Speeders Of The Sky

A huge electric "traffic cop" for those mystery speeders of the universe—cosmic rays—nearly completion in the University of Chicago laboratory of Dr. Arthur Holly Compton, noted physicist.

It was designed on the same general principle as "speed traps" for human motorists. The idea was to pull these out of line as raced along, slow them down, and take their "speederprints."

Because the rays are believed to travel almost as fast as light—whizzing along at 183,000 miles a second—powerful electric currents are required to brake them even slightly.

Thus the "traffic cop" is a 12-ton magnet capable of producing an attraction in a cubic foot of air 40,000 times as great as the earth's magnetic pull.

A woman is not necessarily thinking of her husband's comfort when she buys him soft undershirts. She may be looking forward to the time when she'll be using them for dusters.

Novice (with great determination after numerous attempts) : "I'll stay here till I hit this ball."

Caddie: "Well, ye can get some other laddies to haul yer sticks, for this is me bath nicht."

### Has Useful Gift

King Edward Always Able To Make Appropriate Speech

When King Edward (an Prince of Wales) was in Canada and had to make a speech at almost every railway division point, people said his speeches were written by a secretary. When, years later, he began appearing at important public functions at home and abroad, with his speeches growing in maturity, it was considered that he had improved on the manuscript of a "ghost." To certain people always wise about what goes on in high places, no statesman or ruler ever had a mind of his own.

No "ghost" could have written the little speech which King Edward made to 8,000 Canadian Vimy pilgrims at Buckingham Palace. Yet, impromptu as it was, made upon impulse, it was a model of its kind. John Morley once said that a good speech depended upon where it was made, how it was made, and what was said, adding the gay cynic that the least important was the last. "It was a poor speech for Morley to have made."

A good speech depends almost mainly upon one thing: whether it is appropriate. If a speaker can feel and touch the mood of an occasion, if, in other words, he can have a sense of proportion, then he is speaking well.

What made King Edward's speech to Vimy pilgrims a model was his ability to be appropriate. He was not speaking as a Monarch on a great State occasion. He was speaking as a war comrade to old comrades on a festival occasion. Hence the opening touch of reverence regarding Vimy Ridge, the quick passage to the happier chivalry of the time when the spirit of humor, followed by a simple welcome to Buckingham Palace, the sincerest wish for a happy journey home. In thought and simple diction, in freedom and pomposity and artificiality, no speech could be happier.

Monarchs are not wont to speak like this. Not great rulers. Stalin speaks like a page from Marx. Hitler is reminiscent of an illiterate Nietzsche. Mussolini recalls Napoleon. Yet, whereas these are the ordinary run of speakers who, every time they get upon their feet, think they must imitate their feet, think the world is open to the public speaking a plague—Ottawa Journal.

### Attract Few Visitors

Not Many Tourists Make Trip Through Sewers Of Paris

The famous sewers of Paris, which are open to the public,吸引ed 1,107 visitors in 1935. The underground tour from the Place de la Concorde to the Madeleine church is taken in small boats in the underground passages, made famous by Victor Hugo's "Les Misérables".

The sewers are open to the public only in summer months, one day a week, and the eerie boat trip can be made for 3 francs per person. Last year's traffic brought about \$285 to the coffers of the French government.

Today Parisian sewers extend from 600 to 700 miles in length, but only a quarter of a mile is available to curious tourists.

Ethiopia was the last independent country in Africa.

Birds have the highest body temperature of any creature.

### Summery Panel Gives Walls Charm

PATTERN 5633

Feathery cosmo in their natural lovely colors will prove fascinating embroidery. They're equally lovely on a light background, too. The pattern 5633 you will find a transfer pattern of a panel 15 x 20 inches; a color chart and key; material requirements; illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

### BELGIUM'S AMBASSADOR

Baron de Cartier de Marchienne, Belgian Ambassador to Great Britain, arriving at No. 10 Downing Street for a conference of the London Powers.

### German Ambassador To London

Von Ribbentrop Appointed To World's Prize Diplomatic Post

Joachim von Ribbentrop, chancellor Hitler's personal emissary on many important diplomatic missions, has been appointed German ambassador to London.

Von Ribbentrop, appointed to what is considered the world's prize diplomatic post, is a former champagne salesman.

Only last April his appointment to a higher rank in the "S.S.", or Black-Shirted Nazi guard troops by Chancellor Hitler was looked upon as a new induction of the Nazi leader's faith in him.

The rank of ambassador-at-large with special duties subsequently was given to Von Ribbentrop and as such he has had much to do during negotiations for cementing of relations between the Reich and Great Britain. He endeavored unsuccessfully to obtain a sympathetic response from French war veterans when he assured them of German war veterans' friendship.

Tall, with thin face and wavy hair, Von Ribbentrop before the Great War was popular in society in Ottawa.

### Too Much Borrowing

President of Columbia University Has Warning For Nations

Nicholas Murray Butler, president of Columbia University, has warned the famous universities of Paris, which are open to the public, that national debts at the rate of \$10,000,000,000 a year by 1950 will reach the end of their borrowing tether in another year. Restore the world's buying power, he says, or we face a "calamitous crisis" in the not distant future.

Dr. Butler has a prescription to prevent the world's economic breakdown: Restore confidence in the capital and credit markets and thus cause trade to expand normally. This would bring about an immense increase in national incomes; relief needs would be lessened and budgets could be balanced.—Detroit News.

In Japanese feudal days, the samurai soldiers, who usually had a lesser mobility, received their yearly salary in rice. A samurai of high rank earned as much as 250 tons of rice annually.

### SUNDAY SCHOOL LESSON

AUGUST 23

#### THE GOSPEL FOR ALL MEN

Golden text: "For we know that the world that then was, has been overthrown, that whosoever believeth on him should not perish, but have eternal life. John 3:16.

Lesson: Acts 10:1, 11:18; Romans 1:16-17.

Devotional Reading: Isaiah 11:1-5.

#### Explanations And Comments

Peter describes his Action to the Church of Jerusalem in Acts 10-11. In chapters 10 and 11 of the Acts we have two accounts of the way in which Cornelius, the gentile, and his household heard the gospel, believed in it and were baptized. In chapter eleven Peter records the events as they happened, and then in chapter twelve Peter records the events as they happened to the Church at Jerusalem.

The apostles started at the opening of the door to the Gentiles. On Peter's return to the Gentiles he was received by the church. Up to this time Peter's authority had been unquestioned and it must have cut him to the quick to have his actions questioned. He was not afraid, however, of preaching to the Gentiles.

Peter had a vision in which he saw all manner of beasts and creeping things, birds. Peter was hungry and it was natural for him to eat what was suitable for food should present themselves to his mental eye.

Peter had a vision in which he saw a lamb and a bird. Peter was hungry and it was natural for him to eat what was suitable for food. Peter, and he cried out, "Not so, for nothing common or unclean has entered into my mouth."

Recall Mt. 16:22 and John 13:8. Levitical law prescribed what animals could be slaughtered for sacrifice. Peter had been under the influence of the Jewish belief in contact with other animals he would be unclean.

Then Peter heard a voice speaking at a normal tone and saying, "What God hath cleansed, make not thou common." This was done thrice, and as was drawn up in the heaven.

Peter had taken the vision to mean simply that the Mosaic regulations as to meats were to be abolished in order that Jews and Gentiles might be equal in the eyes of God.

But he knew that it had a deeper and wider significance—that man and creature were to be regarded as common property, to be regarded no respecter of persons. Acts 10:34.

Peter next told his accusers how he had been at Caesarea with the centurion, who had sent to him from Caesarea, and the Spirit had gone with them, making no distinction, paying no heed to the rank of the Gentiles. He fully grasped all the implications of the vision, and realized the occasion for his summons.

### Pioneer Of Pacific Coast

Capt. John Irving Was Owner Of First Steamship Service Between Victoria And The Mainland

Capt. John Irving, 82, owner of the first steamship service between Victoria and the mainland, died recently at Vancouver, following a month's illness.

Capt. Irving was born aboard a sailing ship operated between San Francisco and Portland, Ore., by his father. When his father died John took over operation of the Irving Pioneer Line.

Capt. Irving also organized the Columbia and Kootenay Steam Navigation Co. in 1891 and in 1891 and 1897 he organized the Yukon Navigation Company which he eventually sold to the White Pass Railway Company in 1900.

In 1894 Capt. Irving was elected to the British Columbia legislature as member for Cassiar and was re-elected in 1897.

A little girl sitting in church, watching a wedding, suddenly exclaimed:

"Mummy, has the lady changed her mind?"

"What do you mean?" the mother asked.

"Why," replied the child, "she went up the aisle with one man and came back with another."

At one of a series of lectures a woman wanted a seat and General Garfield brought one and seated her.

"Oh, you're a jewel!" she said in appreciation.

"Oh, no," replied Garfield, "I'm a jeweler; I've just set the jewel."

Tractor trains, 75 feet long, are being tried in South Africa.

### Coleman Hot Plate Cooks with Air!

Handheld cooking unit for campers, motor-cars, motor-cycles, motor boats, etc.

• Burns 500 air-  
45 min.  
• Makes its own gas  
from gasoline  
or kerosene  
• No propane  
or methyl  
gas  
• Economical  
use of fuel  
operates both burners  
for 20 hours.

PRISED AS LOW AS  
\$7.00! One burner  
two burner models  
available. Write  
for catalog  
THE COLEMAN LAMP  
Co., Dept. W-200,  
Waco, Texas.

• Use any  
gasoline  
or kerosene  
connection  
• Lights instantly  
• No pre-  
heating  
• Economical  
use of fuel  
operates both burners  
for 20 hours.

• Nearly all aircraft are superstitious  
when starting on a dangerous flight.

Colonel Lindbergh pinned his faith on an elk's tooth, and the Moths take a rusty and well-worn horseshoe wherever they go.

The French, although possessing many hard-headed traits, are intensely superstitious and Napoleon himself was no exception to the rule.

It is considered very unlucky in France to whistle indoors, and the great French conqueror once reduced an aide-de-camp for daring to pipe a melody within the precincts of the Palace of Fontainebleau.

Boxers are superstitious people, Max Baer will go elsewhere without a max goliath, which he looks upon as having contributed to all his good luck in the past. Carpenter's mascot was a small golden wishbone which he carried on his watchchain.

Actors have their own superstitions which exist nowhere else but on the stage. One is that one must mention the title of a play on its first night until the curtain has risen. Martin Harvey became so nervous at an infringement of this custom on one occasion that he completely forgot his opening lines, and had to improvise heavily.

Elephant is considered a mascot of good omen given to her in India, and would not be consoled when it died. She firmly believed that her acting days were over! And it is well known that her great contemporary, Sarah Bernhardt, slept in her coffin every night for years in the belief that it would postpone her death. Willis Clarkson, perhaps the greatest wig-maker in the world, left a dinner party attended by distinguished guests because he had spilled the salt.

Kemal Pasha, who has done so much to modernize Turkey, is himself a believer in many superstitions. One of them is that it is unlucky to bring flowers into the house, and their absence is one of the first things noticed by his visitors.

### Holding Celebration

HOSTERS OF TROYES, France, Are Planning Colorful Festival

In picturesque fashion, the hosters of Troyes, France, will evoke history of stockings across the ages in a colorful stocking festival to be held next September. It is not known when the first stocking was made, but historians of the industry there say that silk stockings were "invented" about 400 years ago. Consequently, the September festival will celebrate this anniversary.

Until the 16th century all stockings were of ordinary cloth. King Henry VIII was the first English monarch to wear silk stockings (made with Queen Elizabeth) which was probably the first known to have been worn.

"I like silk stockings so well because they are pleasant, fine and delicate, and I will wear no more cloth stockings."

Reasons. It figures in the military career of Joan of Arc; it possesses the only Gothic church made of wood existing in France today; and in addition is the stockholding capital of France. Its production of stockings is distributed all over France, and part of it is exported abroad.

Pocket instruments which tell accurately the altitude and direction of flight are being offered to air tourists.

Consumption of leather by the automobile industry of the United States has been declining steadily since 1922.
